

Dashboard- Malaria in Africa

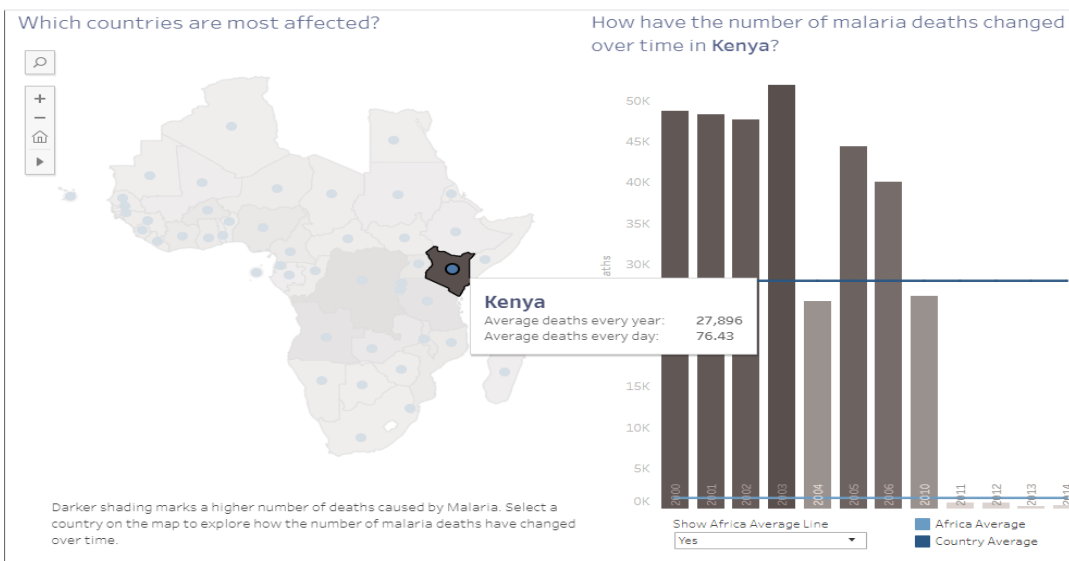

Insight 1# Namibia was able to control malaria

If we click on Namibia we can see a column chart adjacent which shows the no of deaths in Namibia from 2001-2014 and as we can see the no of deaths has been drastically gone down from 1750 in 2001 to around 50 in 2014.

Insight 2 # Death rate is below avg African death rate in Kenya in 2014.

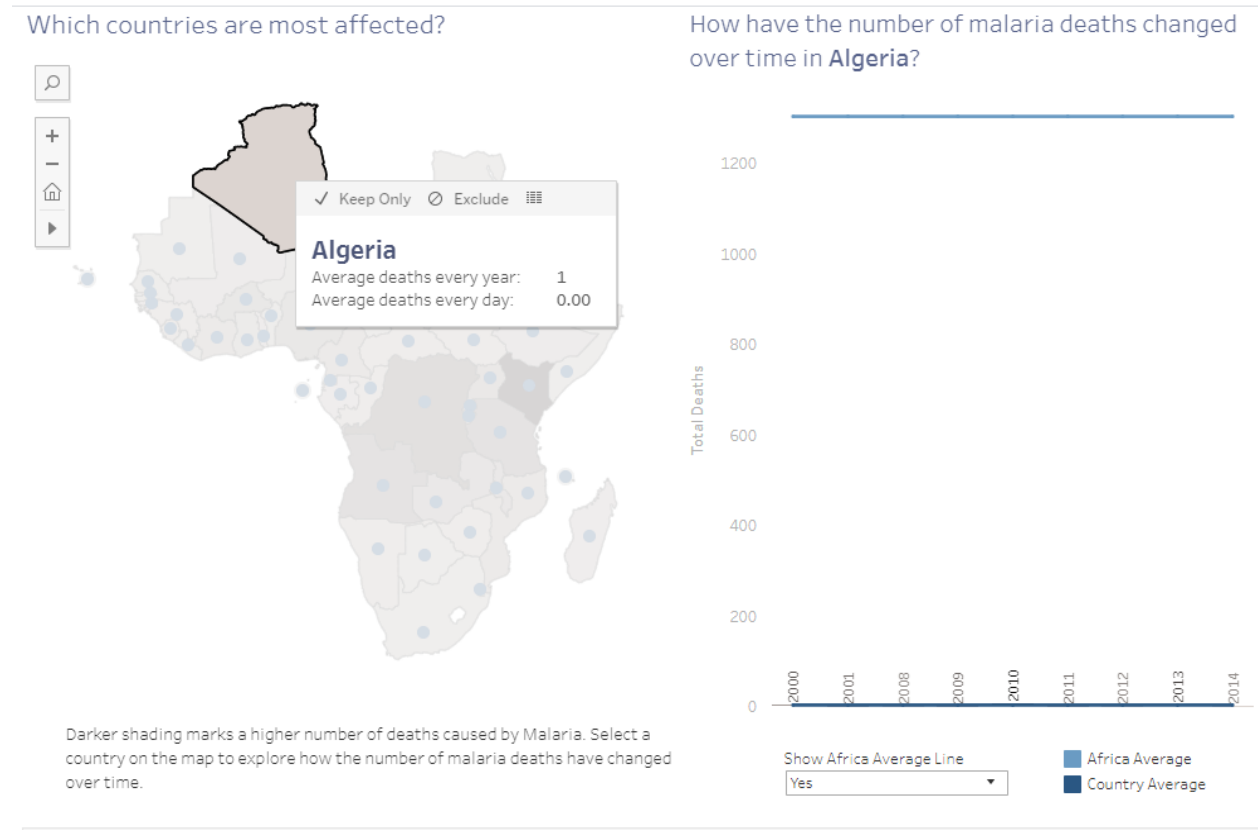

If we click on Kenya from the column chart we can see that no. of death in 2000 from malaria was around 49 k which is way above avg African deaths but in 2014 it is less than 1 k which is below the avg death rate.

PROJECT 1

Insight 3# Algeria is malaria free country

If we click on Algeria we can see that avg deaths every day is 0 and as well as we can see that from the column chart as well that death rate in Algeria is almost 0 ,Hence we can say that Algeria is malaria free country.
